

T3 Frame has a range of standard and custom profile beams and curves. These lengths allow for complete product and system flexibility when designing and assembling your displays.

Beams and curves are measured from Centre to Centre when designing your structures. Below is a reference diagram of how the lengths are measured.

EXTRA INFORMATION

Bespoke sizes: We can supply any length of profile from 18mm - 3000mm and any radius of curve from 490mm c/c - 80000mm c/c. We also supply angled fittings from 10° - 89°. All this allows you to create virtually any structure.

STANDARD PROFILE LENGTHS CENTRE TO CENTRE (C/C)

Client:		Angle Depth :
